HOW TO READ THE SPARE PARTS CATALOGUE

In the spare part catalogue, after the exploded diagrams, there are the components lists of the boilers; this is the meaning of the different columns:

| | |
|--------------------|--|
| Pos. | Identification number of the component in the exploded diagram of the boiler. |
| Description | Short description of the component. |
| Code | BAXI S.p.A. code of the component. |
| Tab. XX | XX is the exploded diagram number of the boiler taken into consideration. |
| From serial number | Date (year and week) identifying the beginning of production of a component (taken from the serial number of the boiler). e.g. B005: year 2000 (B identifies the decade 2000-2009; 0 identifies the year) – 5th week. If the box is empty, the component is in use from the beginning of production of the boiler. |
| To serial number | Date (year and week) identifying the end of production of a component (taken from the serial number of the boiler). e.g. B012: year 2000 (B identifies the decade 2000-2009; 0 identifies the year) – 12th week. If the box is empty, the component is still in use. |
| Interchangeable | It identifies the interchangeability between the new component and the old one. YES: components are interchangeable. NO: components are not interchangeable. |
