THREADED/FLANGED CIRCULATORS

Ego (T) (C) easy -60, -80, -100, -120 single and twin

High performance wet rotor circulation pump with threaded or flanged connection, motor with permanent magnets and built-in electronic controller.

APPLICATION

Residential and industrial heating and air-conditioning systems.

FEATURES

- Built-in frequency converter
- Multiple operating modes
- Numeric and graphical display for easy setup and visualisation of parameters
- Automatic venting function
- Built-in overload safety device
- High input torque (with consequent automatic release of the rotor)
- Optional communication module (with Ethernet port, 0-10V contact, digital inputs etc.)

PUMP TECHNICAL DATA

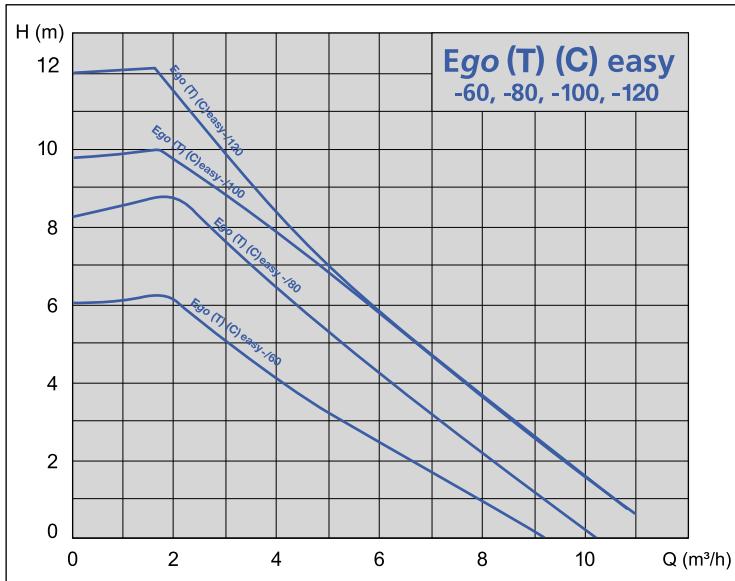

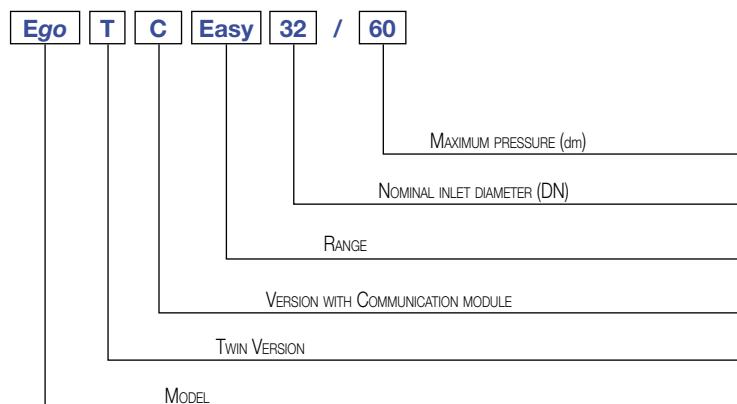

- Liquid temperature: -10 ÷ +110 °C
- Room temperature: 0 ÷ +40 °C
- Relative air humidity: ≤ 95%
- Allowed fluids: clean, not aggressive and not flammable, free of solid particles or fibres
- Maximum pressure: 10 bar
- Minimum suction pressure:
 - 0,05 bar a 50 °C
 - 0,8 bar a 80 °C
 - 1,4 bar a 110 °C
- Maximum amount of glycol: 20%*
- Threaded inlets: G1½" – 2" (in accordance with ISO 228)
- Flanged inlets: from DN 32 to DN 50
- Protection degree: IP44

MOTOR TECHNICAL DATA

- Type: synchronous with permanent magnets
- Motor speed: variable
- Supply voltage: 1~230V
- Frequency: 50/60 Hz
- Insulation class: F

* For greater amounts please check the final viscosity and the conditions of use

IDENTIFICATION CODE

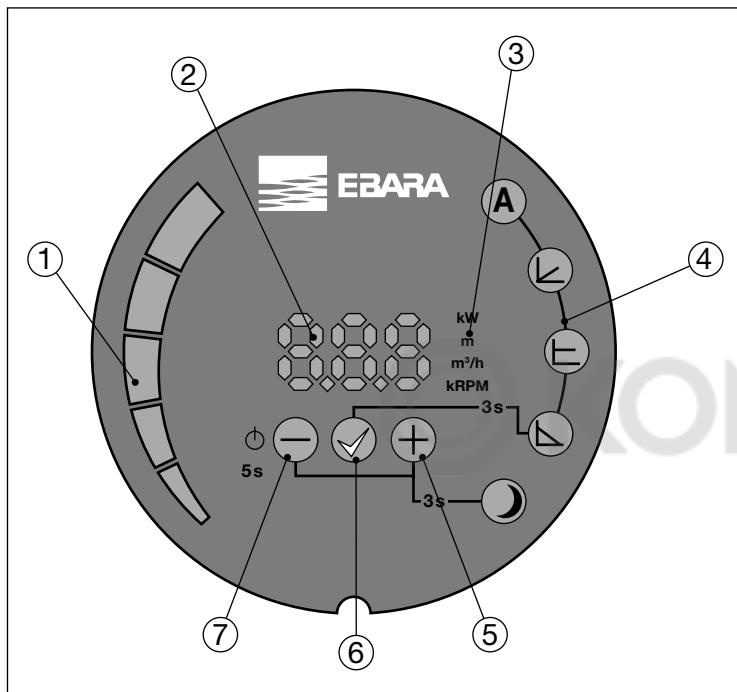

THREADED/FLANGED CIRCULATORS

Ego (T) (C) easy -60, -80, -100, -120 single and twin

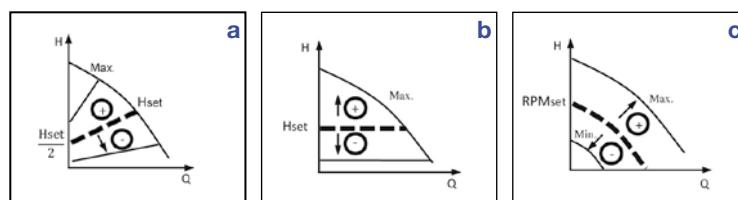

OPERATING MODES

The operating modes can be selected using the buttons located on the rear panel:

KEY

- 1 Segment display
- 2 Numeric display
- 3 Display of selected parameter
- 4 Display of selected mode
- 5 Selection key
- 6 Confirmation key
- 7 Selection key

AUTO mode (factory setting)

The circulator automatically adjusts the hydraulic performance depending on the actual requirements of the system, continuously measuring the optimal H/Q point. This operating mode is suitable for most applications and ensures high energy savings.

Proportional pressure (ΔP -v) - fig. a

The circulator adjusts the pump head depending on the flow rate, varying the latter linearly from a maximum value (H_{set}) to a minimum value (equal to $H_{set}/2$). The pressure value (H_{set}) is set via buttons \oplus and \ominus and is expressed in metres; the minimum value is automatically calculated by the circulator.

Constant pressure (ΔP -c) - fig. b

The circulators maintains the pump head constant when the flow rates varies. The value of the pressure (H_{set}) is set via buttons \oplus and \ominus and is expressed in metres.

Constant speed - fig. c

The circulators operates according to a constant curve set via buttons \oplus and \ominus (by selecting the rotation speed in "rpm").

Night mode

Night mode can be activated in combination with any of the operating modes listed above, and allows the circulator to operate at a minimum curve (therefore with very low consumption) when it detects a decrease in liquid temperature of 15-20 ° C. When temperature rises, it automatically returns to normal operating curve (according to the selected mode).

THREADED/FLANGED CIRCULATORS

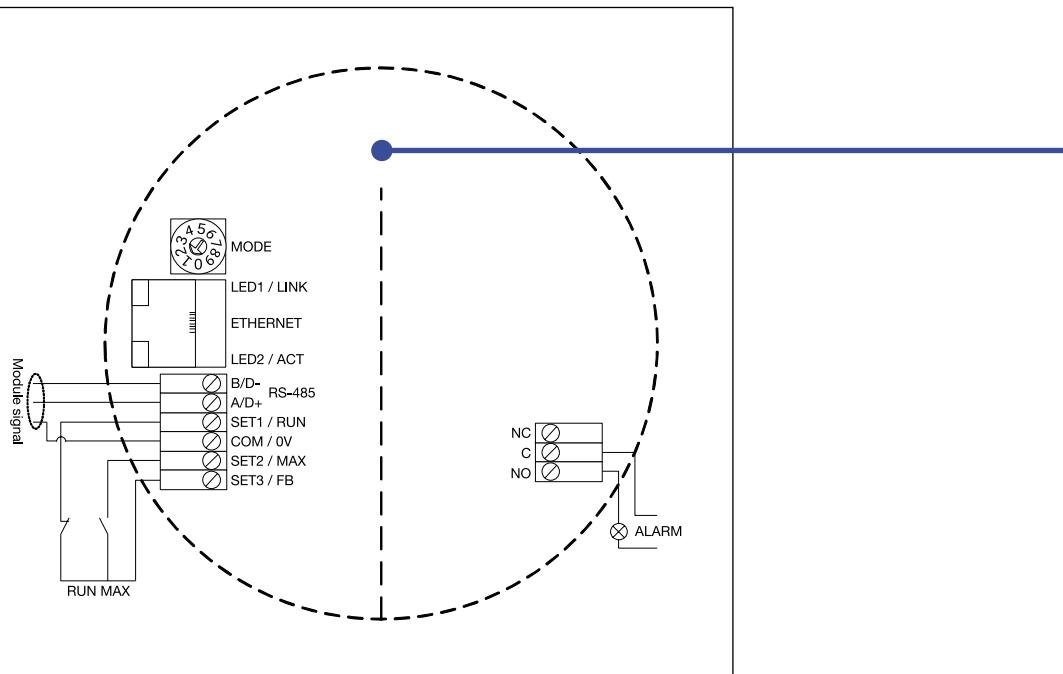

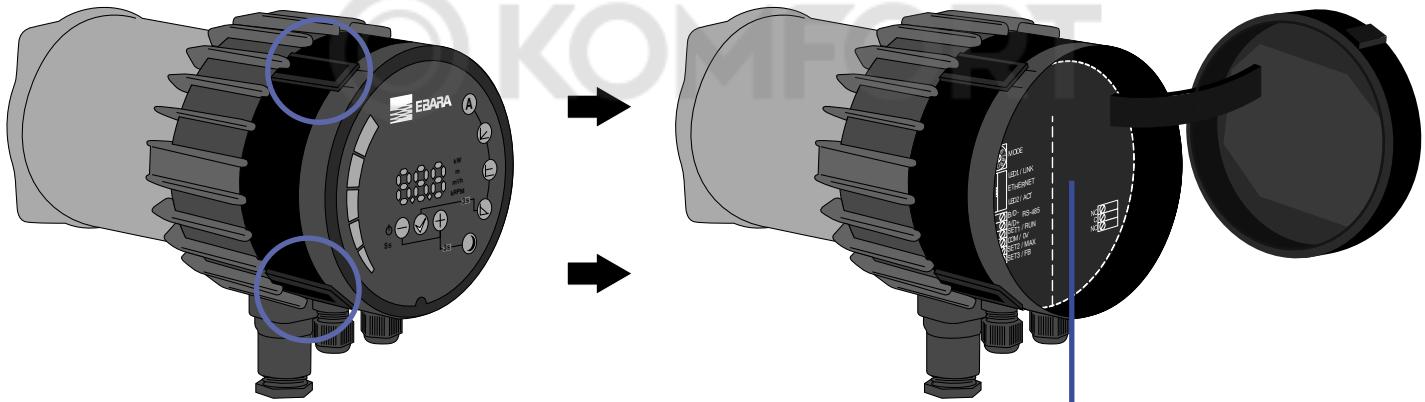

Ego (T) (C) easy -60, -80, -100, -120 single and twin

COMMUNICATION MODULE

Versions **Ego T C easy** are equipped with an additional communication module which can be accessed by opening the rear display panel. The communication module is also available as an optional accessory. It is compatible with all standard models Ego easy.

The module enables running a wide range of applications remotely:

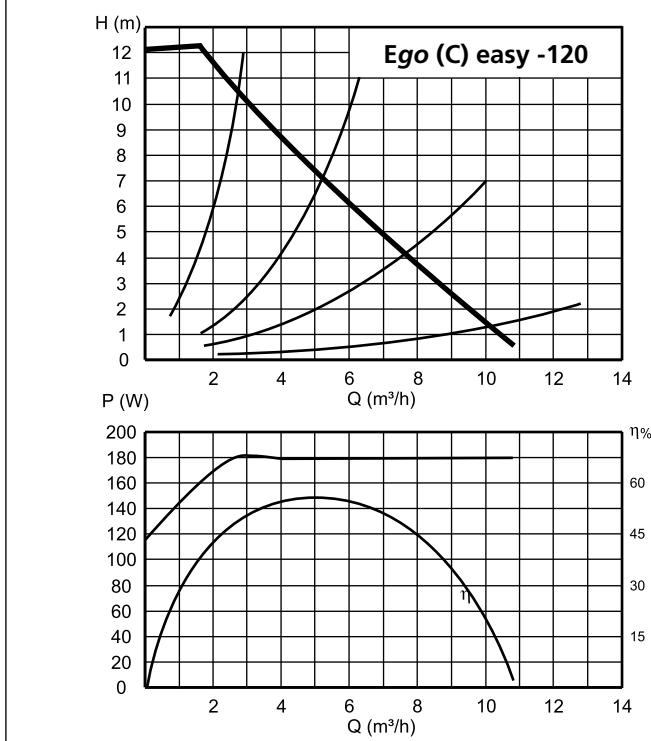

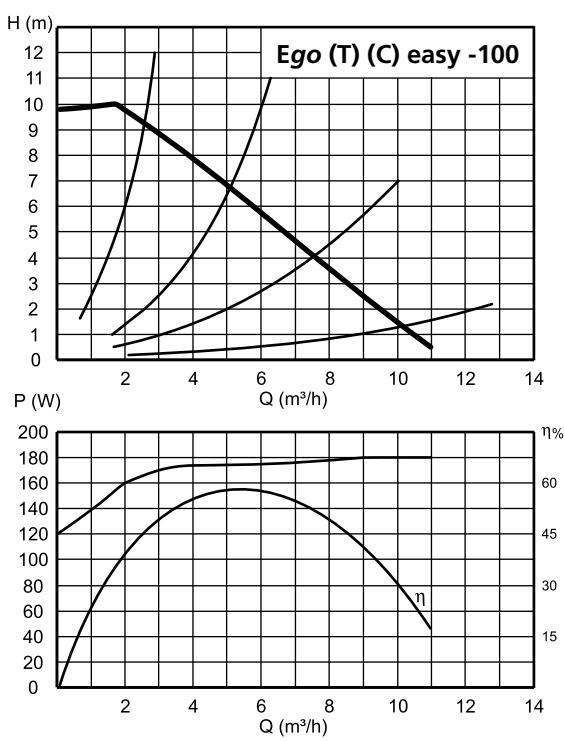

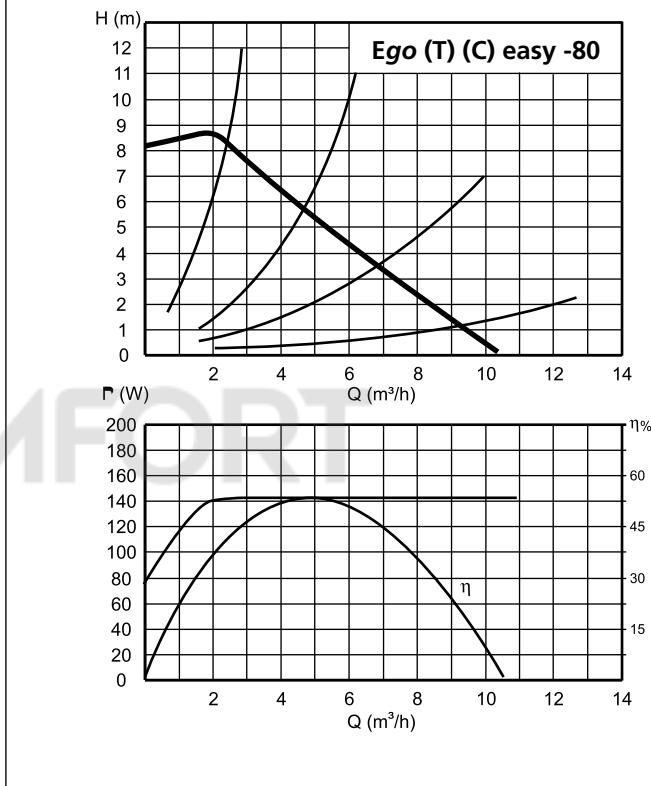

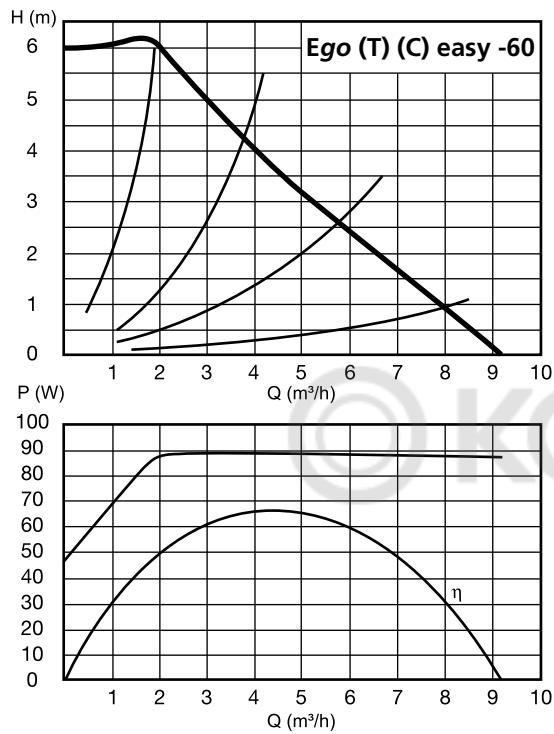

- Access via Ethernet
- Remote On/Off
- Analog control 0-10V
- Modbus RTU
- Alarm/state relay
